

## EXPERIENCE

### CUSTOMER LIFECYCLE MARKETING

Took my experience as a CSD to client marketing; Developing strategy and leading the implementation & management of scalable, programmatic, and comprehensive ways to communicate with existing customers throughout their lifecycle... ultimately compelling them to take action in ways that support objectives around customer satisfaction and experience, customer lifetime value, product & feature adoption, retention, growth, and loyalty.

#### Getting customers to...

- Engage with the platform
- Interact with their CSM
- Understand the value they're receiving
- Learn about other products and upsell opportunities

#### How

Tailoring content & interactions based on the customer's step is in their journey.

#### Best practices

- Personalize interactions
- Omni-channel experience to reach customers where they are
- Survey customers to find out points of friction
- Continue nurturing customers post-purchase

#### Other

- Work doesn't end at the customer acquisition stage – post-purchase nurturing, engagement, and education is crucial to retention.
- Importance of analyzing customer personas – Their behaviors, motivations, challenges, channels
- Don't assume the everyday user or main POC is the person who made the buying decision or was involved in the implementation or previous work
- Collaborating cross-functionally with Demand Gen, Product Marketing, Creative, Content, Customer Success, Sales and other teams.
- Advocacy – Inspiring clients to take action by gathering & showcasing the successes of other companies
- Enablement – Added CS enablement piece rather than relying just on direct to customer.

#### Retention/Reduce churn

- The best way is to deliver consistent value & a positive customer experience.
- Identify top reasons for churn, establish a customer feedback loop, and define & collect risk signals.

#### Metrics

- Activation rate and time
- MRR and Lifetime value
- Product/platform usage (frequency of use and depth)
- Education content engagement

#### Examples

- [BV] Connections – responsible for increasing engagement with portal
- [BV] Inspire – one of the most impactful ways to secure renewals & upsells
- [BV] SEI – company's largest annual thought leadership, with CS specific derivative assets & training
- [BV] Webinars w/ the most attendees and resulting leads
- [BV] All content made into customer-centric versions

### ADVOCACY

Built scalable programs to: Identify and recruit prospective advocates > Nurture the relationships > Mobilize them to take action

#### How

- Turning satisfied and successful customers into brand ambassadors who can amplify their positive experiences in ways that provide third-party validation and add credibility and trust.
- Gathering & showcasing the successes of clients & infusing it into everything we did – from MKT and Demand Gen to Sales, CS, Product & other areas of the biz.

#### Why

- B2B prospects & clients want to see what others are doing to be successful. They're more inspired & influenced by others who share similar challenges & goals than from hearing only from the company.
- Their voices & stories serve as proof points that strengthen a variety of cross-departmental initiatives like securing renewals, winning new deals, and improving marketing efficacy.

#### Repositioning of 'Referral Program' to 'Advocacy Program':

Redefined and broadened the program in how it sources advocates & how they're leveraged.

#### Sources

- Gainsight health scores (scalable, programmatic)
- CSAT and NPS (scalable, programmatic)
- Sales contracts and renewals
- Client stories
- CS rewards program and impact on employee eval
- CS enablement
- Inspire post-event survey
- Direct outreach

#### Outputs

- References (250)
- Case studies (75) – considered most valuable asset by sales
- Client presenters (100) – always rated as top session
- Content used in highest performing assets – ebooks, webinars, events
- Client stories (300) – weaved in all content & derivative material
- Testimonials & reviews (270)
- Speak publicly (100) – events, Summit
- Logos
- G2Crowd

#### Keys to success

- Experience and relationship with CS
- Shift in messaging from an Ask to an Invitation and better communicating the "What's in it for them", which is more compelling
- Focusing on high-impact engagement
- Identifying gaps and needs (by industry, size, challenge, solution, etc) and targeting those more aggressively
- Tracking advocacy-influenced revenue
- Incentivization
- Use it as a feedback loop for Product

#### Examples:

- [BV] Advocacy Hub in Confluence for enablement

## SEGMENTATION

Understanding and evaluating specific buyers' needs, responsibilities, pain points, and goals and tailoring the marketing messaging, content, and campaigns to hit the right audience with the right message at the right time.

### Messaging, Content, Product Marketing, and Reporting by...

#### ... step in the prospect journey or funnel

- Awareness (TOFU)
  - Messaging & content that's educational and showcases thought leadership via blogs, webinars, whitepapers, emails
  - Success metrics: SEM, traffic, ad imps, emails sent
- Consideration and Engagement (MOFU)
  - Messaging & content that's engaging, proof-based, and conversion-focused via comparison guides and case studies
  - Success metrics: Open rates, form fills, leads, MQLs
- Decision (BOFU)
  - Messaging & content that's more personalized, handles objections, and compels action via demos and contact forms
  - Success metrics: Opps, pipeline, SQLs, closed won deals, revenue

#### ... stage in the customer lifecycle

- Educational content for activation & onboarding
- Content that's aspirational & reinforces value of the program for renewals, upsells & loyalty

#### ... audiences and personas

- Company profile – industry, size, business challenges and goals
- Persona – job title, responsibilities, pain points, KPIs

#### ... channel

- Web, Email, ABM, PPC, Social, etc.

#### Examples:

- [WPE] 20+ email nurture streams, LPs, and ads by Vertical (tech, profess services, travel), Job Func (Technologists vs. Marketers), & Job Level (Decision-makers & EBs vs. Users)
- [WPE] Message House
- [BV] Customer Marketing segments by BV product, Retail vs. Brand

## REPORTING

Improving the team's ability to collect performance data, report on campaign effectiveness, identify areas of improvement, and help cross-functional stakeholders make sense of the data.

### Measurements of success

- Performance by stage in the prospect/customer journey
- Performance by audiences and personas
- Performance by channel
- Performance by campaign

### Examples

[CB] Refined data and reporting

- Increased adoption of all the data at our disposal to learn more from historical performance and better inform decisions.
- Incorporated all paid platforms to DataStudio to make monitoring performance across all products easier.
- Created high-level, exec summary views
- More visualization
- Shifting focus away from vanity or TOFU metrics like traffic and CPC
- Solved for real-time visibility into pacing of quarterly KPIs
- Post-campaign reporting that includes performance data, but also shares key learning/takeaways

Google Ads > HubSpot > SFDC > Looker

### QBRs

## PERFORMANCE MARKETING

Strategy, planning, coordination, execution, optimization, reporting, & scaling of SEO, Paid Media, and ABM activities to reach targeted audiences w/ the right messages at the right time & move potential buyers down the sales funnel – from awareness & consideration to decision & conversion.

### It entails...

- Collaborating cross-functionally with DG, Product MKT, Creative, Content, CS, Sales, and other stakeholders.
- Analyzing performance data to continuously optimize campaigns, improve channel tactics, identify opportunities, and share insights.
- Understanding the different technologies/tools – advertising platforms, mkt automation, CRMs, reporting and data, and other critical solutions.
- Willingness to be creative and experiment.

### Paid elements:

- Strategy: goals, success metrics, audience targeting, messaging, channels
- Setup: Campaign architecture, Keyword research, Bidding, Ad copy
- Daily management
- Testing and CRO
- Display and ABM
- Reporting on ROAS and other performance metrics

**SEO elements:** On-page tagging, Tech health (indexing, markup, etc), Content

**CRO elements:** Personas, UX audit, Mockups, A/B tests

### Metrics:

- TOFU: traffic, impressions, cpc
- MOFU: site engagement
- BOFU & beyond: conversions, CPA > leads, MQLs, pipeline

## CONTENT

Guiding the planning, development, publication, and distribution of content from start to finish – building or optimizing the creation process, maintaining content calendars, crafting persona-based messaging, organizing assets and managing content storage, informing design, producing long-form and short-form derivative material of different types and for different channels.

### Messaging that...

- Articulates a product's value in a way that resonates
- Tells a story
- Translates technical concepts into customer benefits
- Helps the buyer see the products as a way to solve their challenges & accomplish their goals
- Is consistent across channel
- Is tailored for each targeted audience or segment
- Matches the user's stage in buyer journey & preferences in content types
- Compels them to take action
- Includes a variety of types, formats, and for different use cases

### Examples

- [BV] Case studies – considered most valuable asset by sales & confirmed in W/L
- [BV] SEI – largest & most impactful thought leadership piece
  - Outputs: Ebook, microsite, industry specific infographics, webinar series, email campaigns, social posts, PPTs, translated regional versions, and other derivative assets
  - Impact: Most engagement and leads, and serves as a major source of content used throughout the year.
- [BV] Webinars w/ the most attendees and major lead source
- [BV] Inspire PPT
- [WPE] 20 email nurture streams by segments
- BV content database/storage

## PRODUCT MARKETING

Looking at the specific needs, responsibilities, pain points, and goals of buyers so marketing messages, content, and campaigns can be tailored to hit the right audience with the right message at the right time.

Translating complex technical concepts into clear, impactful narratives

### Impact and value

- Improved mkt efficacy (website, LPs, email, ads, etc)
- Led to changes in sales pitch decks
- Informed internal resource allocation
- Surfaced gaps and needs in content

### Examples:

[WPE] By segments:

- Vertical/industry – Tech, Profess Services, Travel, etc
- Persona – Job Func & Job Level (Technologists vs. Marketers, Decision-makers vs. Users)

[Expedia] GTM: How we GTM with new products, features & content:

- Standardized launch classes w/ predefined set of outputs
- Marketing briefs and kickoff meetings to intro the project, solicit input from SMEs, define KPIs, and commit to next steps
- Channel-specific activation briefs with specs
- Reporting requirements
- Ongoing mtgs to review performance
- \* Success led to other departments replicating process

## ENABLEMENT (CS-CENTRIC)

Helping CSMs be more efficient – arming them with impactful knowledge, content, & resources...letting them focus on relationships & strategy.

Added CS enablement piece rather than relying only on direct to customer.

### Field Resources:

- [BV] MKT Hub – Field confidence survey: “It's hard to find the content or resources I need”. Proactively addressed the pain point by building a starting point for finding info in a convenient, user friendly way.
- Stats Library – Definitive db of 300+, full attribution, recent, sortable, filterable, graphics.
- Client Facing Best Practice Decks and Talk Tracks –added scalability and efficiency by addressing duplicative work among CS and inconsistencies in branding & messaging
- [WPE] Message House

### Content:

- Created special marketing content, resources, & enablement material for the field, especially CS (most content is traditionally for awareness and prospects, not CS)
- Derivative assets: PPTs from ebooks, webinars, pitch decks & 1 sliders
- [WPE] Salesloft

### Training:

- Part of onboarding
- Presenter/speaker training
- Walkthroughs of decks w/ talk tracks (esp. client stories)

## EXAMPLES

### IMPROVED PERFORMANCE – MOMENTIVE

#### Issue: Poor digital performance, especially pipeline and sales

The team overemphasized efforts that drove leads without considering quality; The team lacked defined KPIs, making it difficult to make smart decisions or define and track success.

- Increased adoption of all the data at our disposal to better inform decisions, including combining all data streams.
- Optimized and reported more on MQLs, SQLs, DQs, and other down-funnel success measurements that have a true impact on the business rather than basing optimizations too heavily on in-platform conversions/leads (Ex: Better allocating spend...Facebook drives leads but MQLs get DQ'ed).
- Targeting the right balancing between quality & volume and sacrificing volume when the net gain is positive.
- Incorporated all paid platforms to DataStudio to make monitoring performance across all products easier.
- Better utilize the ICPs, messaging docs, product briefs, and other product mkt resources to ensure alignment between the targeted audience, search intent, and the products we promote.
- Increase collaboration and knowledge-sharing between SEO and PPC
- Dedicated more time to deep dive into specific accounts via a collaborative, weekly recurring meeting to share insights and analysis, gather fresh ideas, and craft solutions to address any issues or lags in performance.
- Established digital-specific goals mapped to OKRs that incorporated KPIs by function, and took into account the lead-to-sales journey, including the required # of MQLs, cost-per-SQL, MQL-to-SQL CV rate, and other full-funnel metrics.
- Shift to spending more on TOFU and MOFU rather than just BOFU, where spend is directly and immediately tied to MQLs.
- Created budgeting tool

### CONTRIBUTE MORE STRATEGICALLY – MOMENTIVE TEAM PERCEPTION

**Issue:** The digital team was viewed more as a “shared service” than subject matter experts and true collaborative partners.

- Got our team involved earlier in the campaign ideation and development process, so we'd have ample time to collaborate, strategize, provide subject-matter expertise, and make data-based recommendations to set the campaigns up for success.
- Being more proactive and authoritative in recommendations and not being afraid to question or push back.
- Agreed on and communicated an allocation of hours to ensure our time aligned with the priority/importance of the products.
- Improved recurring meetings with DG to provide more insights into what's working, what isn't, and what we're doing about it.

### COLLABORATION OR PROJECT LEAD – BV SEI

#### SEI: The company's largest and most impactful annual thought leadership publication.

##### Responsibilities:

- Providing direction of the content
- Creating and conducted all client and consumer surveys (multiple languages to thousands)
- Analyzing survey responses and data for insights
- Project mgt and collaboration w/ all teams and stakeholders
- Internal enablement via trainings

##### Collaboration with teams:

- Analytics – for data and surveys
- Web and Creative – for information design and assets
- Sales and CS – for enablement and training
- PR/Social/Demand Gen – for messaging and assets
- Internal Comms

##### Outputs:

- Content – Ebook, Microsite, Industry infographics.
- Derivative assets – Webinar series, Email series, Blog posts, PPTs, Print booklets.
- Translations and Regional versions

### CONFLICT – MOMENTIVE

**Issue:** Too much time and energy was spent on one-off, short duration campaigns, which was driven by DG.

- Shared data that demonstrated the impact of evergreen & long-term campaigns, which often require less effort & should account for a majority of our leads.
- Created guardrails and SLAs around one-off and short-term campaigns (reqs around lead time, budget, duration, # per quarter, goals, etc) to limit the volume and scope of these types of campaigns and let us focus on higher impact ones .
- Worked with leadership to reshape Demand Gen owners' goals.

## BUILT OR OWNED A PROGRAM – BV ADVOCACY

### Repositioning of 'Referral Program' to 'Advocacy Program':

Redefined and broadened the program in where it sources advocates and how it leverages them.

#### Sources

- Gainsight health scores (scalable, programmatic)
- CSAT and NPS (scalable, programmatic)
- Sales contracts and renewals
- Client stories
- CS rewards program and impact on employee eval
- CS enablement
- Inspire post-event survey
- Direct outreach

#### Outputs

- References (250)
- Case studies (75) – considered most valuable asset by sales
- Client presenters (100) – always rated top session
- Content used in highest performing assets – ebooks, webinars, events
- Client stories (300) – weaved in all content & derivative material
- Testimonials & reviews (270)
- Speak publicly (100) – events, Summit
- Logos
- G2Crowd

## BUILT OR OWNED A PROGRAM – BV G2CROWD

### Owned the initiative to improve the presence on G2Crowd to counter competitor claims

#### What:

- Built profile
- Review generation (direct emails to advocates, Qualtrics in-platform pop-up from 9+ NPS, CS enablement via white label email and incentivization for CSDs, communication from sales during renewal.

#### Results:

- Turned from reactive to proactive, and now leverages top position and award winning presence for sales & mk
- From 8 reviews to 200+ vs. 30 reviews of competitor.
- Highest volume & top rated in category
- Named industry leader 8 Qs in row
- Database of snippets from reviews categorized by industry, company size, value prop, product, etc.
- Analytics for leads and ID'ing at-risk clientsLeverage mkt assets (reviews and badges in marketing material)
- \*\* Went from reactive response to proactive tool by leveraging top position and award-winning presence for sales & mkt teams

## IMPROVED PROCESS – MOMENTIVE CAMPAIGN EFFICIENCY AND QA

### The process of building and launching campaigns was too slow, overcomplicated, overly reliant on others, and error prone.

- Introduced processes to make building, launching, monitoring, & reporting on campaigns more streamlined and manageable – scalable, template-based, standardized, fast, simple, and with less reliance on MOPs and Creative – so we could dedicate more time on being creative, strategic, and prescriptive.
- Improved QA w/ SOPs for pre-launch QA to ensure the entire everything is working as expected and attribution is full-proof.
- Added MQL pacing to reports and meeting agendas to get ahead of potential issues earlier.
- Resulted in more efficiency, faster time-to-market, and performance.

## PROCESS – EXPEDIA REPORTING

Expedia: Revamped reporting to make it easier for channel owners and other marketers to monitor results and interpret data.

- Created high-level, exec summary view
- Incorporated more bottom-of-the-funnel metrics
- Migration to Tableau to combine data streams (Marketo, SFDC, Social, Seismic, Webinars) in partnership with MOPs
- Solved for real-time visibility into we were pacing against quarterly KPIs
- Trained channel owners to run their own reports

## PROCESS AND COLLABORATION – EXPEDIA GTM

### How we go-to-market with new products, features, and major thought leadership content that drives real business impact.

- Standardized launch classes assigned to all campaigns with a predefined set of outputs from each team
- Marketing briefs and kickoff meetings to intro the project, facilitate discovery, solicit input from channel owners, and commit to next steps
- Channel-specific activation briefs with specs
- Reporting requirements
- Ongoing meetings to review performance and potential improvements
- Improved QA w/ SOPs for pre-launch QA to ensure the entire everything is working as expected and attribution is full-proof.

Success led to other departments and the broader org duplicating this process

## PROCESSES AND COLLABORATION – EXPEDIA INTEGRATED TEAMS & OPERATIONS

### Developed & installed back-end processes to bridge the gap between different teams that own different parts/stages of the funnel

Increase the adoption, standardization, usability, and organization of our platforms:

- Project management (Trello) – consolidated number of boards, implemented add-on features, templated check lists, intake forms, and solved for calendaring
- Documentation (Confluence) – combined instances, organized hierarchy, pushed consistent formatting, and commitment to keeping it up to date
- Team meetings – ways to maximize the time investment and outputs of recurring mtgs

## PROCESSES AND COLLABORATION – EXPEDIA INTEGRATED TEAMS & OPERATIONS

**Developed & installed back-end processes to bridge the gap between different teams that own different parts/stages of the funnel**

Increase the adoption, standardization, usability, and organization of our platforms:

- Project management (Trello) – consolidated number of boards, implemented add-on features, templated check lists, intake forms, and solved for calendaring
- Documentation (Confluence) – combined instances, organized hierarchy, pushed consistent formatting, and commitment to keeping it up to date
- Team meetings – ways to maximize the time investment and outputs of recurring mtgs

## PROACTIVE IDENTIFY PROBLEM AND SOLVE OR ENABLEMENT AT BV

### Stats Library

Issue: Stats used across all assets were old, lacking attribution or were incorrectly attributed, inconsistent, or using the wrong kind of graph or visualization

Built a Stats Library – Definitive database of 300+, full attribution, recent, sortable, filterable, graphics.

### Marketing Hub

Issue: Field confidence survey: “It’s hard to find the content or resources I need”

Built a Marketing Hub (Confluence) – Served as a starting point for the field to find info in a convenient, user-friendly way.

## CAMPAIGN – WPE BIGFOOT

**One of the company’s most important initiatives, getting ENT level companies with hundreds of subsidiaries or individual brands that have at least one digital property with WP Engine to move all their sites to WP Engine;** Expansion rather than Acquisition.

- Segmented by personas – Job Funct. (technologists vs. marketers), Job Level (decision-makers & EBs vs. practitioners & users)
- Unique Value Prop for each segment
- Message House
- Enablement for CS and account managers
- Outputs: 20+ email streams, LPs, paid social ads, ABM

Result: Dozen of customers moved all their sites, resulting in 100+ new customers

## RETENTION ETC

**[Apogee or Makeup] Customers need to see the value they’re getting – and they need to see it clearly, simply, and frequently.**

NPS and engagement metrics showed that our reporting was too detailed, not visual enough, focused on TOFU metrics, and . And don’t assume

Solution: Created exec summary versions that...

- ... highlighted the ROI or metrics they cared most about, and moved the more raw data into an appendix
- ... included more visualizations for quick, easy comprehension
- ... made it easy for day-to-day user and main contact to share with their leadership and took an approach of What’s Working / What Isn’t

Learnings:

- Don’t assume that the everyday user or main POC is the person who made the buying decision or was involved in the implementation or previous work
- Need to constantly be educating and training

## OTHER

### Bazaarvoice – Inspire

Own and manage the annual event series held across more than a dozen cities globally each year.

Goal = Increase client engagement and education around...

- How they can maximize their current program and investment.
- Other opportunities they could be leveraging, features/solutions adoption – 50% of attendees said they wanted to be contacted about adding a new feature/solution they saw.
- See what others are doing – 100% client presenters (Macy's, Unilever, Target)
- New biz, upsells, showcase thought leadership, client relations

Impact = 20 globally; 9/10 avg rating; \$1M in influenced pipe, \$500k in closed new business each year

Responsibilities = Everything from developing the content and training presenters to driving registration, reporting on the impact, and creating the day-of experience.

### Bazaarvoice – CS Rewards

Incentive contributions from client relationship owners.

- 50+ CSDs
- Guide dollar values
- Case studies, speakers, co-marketing, panels, bounties
- Real-time dash for visibility

Stories (500+)

- Use company needs to inform kinds of stories needed
- Give guidance to CSDs on high-level 'what makes a strong story' and with tactical presentation
- Build submission and scoring process
- Manage all internal comm

### Awards

Company-wide Cross Collaboration award nominated by peers in other departments

### Speak at events

VIPs, webinars, speaking training

**NEED EXAMPLES of Having to give difficult/unconformable feedback, Failed, Experimentation, Reporting insights into action**
